

# Secure Data Eradication Services

*Sandpiper Data Systems Secure Data Eradication Service provides complete eradication of data from disk storage media, or disk subsystems protecting a company's hard-earned reputation and trustworthiness by preventing confidential information from falling into the wrong hands.*

- *Secure, Compliant Erasure of Disk Storage*
- *Support FC, SAS, SATA, IDE, etc type disk*
- *Compliant with all DOD, DOE and other regulatory requirements*
- *Fully auditable 6 Sigma process*
- *Supports all vendor disk, HDS, IBM, EMC, HP, 3Par, Dell/Compellent, Oracle, Netapp, etc*

## Services Description

*Sandpiper's hardware and software-based technology ensures secure eradication and provides the detailed reporting required to meet today's government, industry and vendor privacy, and security mandates, thereby mitigating 100% of the exposure to legal liabilities or loss of corporate assets.*

*Key benefits include:*

- *Onsite service delivery with no impact to production operations using our mobile eradication platform, direct connection to the customers disk enclosure, or using our system bootable software*
- *Eradication of data using overwriting to a predefined standard, from 1 to n passes*
- *1024-bit encryption code to totally overwrite the data on the media*
- *Fully configurable to meet any applicable standard, including the U.S. Department of Defense Sanitizing (DOD 5220.22-M, DOD 5220.22-M ECE) Standard*
- *Onsite proof of concept can be provided if requested or required*
- *Reports & Eradication Certificate of Data or Destruction for each disk will be provided, certifying compliance with DOD Standard, and any additional requirements*

*Sandpiper's Disk Data Eradication Service provides the most cost-effective and complete eradication of data from hard disk drives. Our technology ensures the secure, DOD compliant eradication your company requires.*

# Secure Data Eradication Services

## Service Qualifiers

### Appliance Required

Disk removes from system  
System has no power  
Failed Disk

### Sandpiper Server Required

Disk can be direct attached  
Subsystem has power  
Large disk systems can be erased at the LUN level

### Using Customer System

Disk Subsystem has power and is attached to an available bootable customer server

### Sales Support

Sandpiper Data can provide the needed sales support for your disk eradication opportunity. By answering a few qualifying question Sandpiper can customize a solution to meet your needs no matter how big or how small.

### Qualifying Questions

- Where is the customer site located.
- How may disk drives require eradication.
- What is the size in gigabytes of the disks.
- Are the disks part of a subsystem.
- Is there power to the subsystem.
- Can the eradication be preformed during normal business hours.

### Engagement Timeline

Sandpiper can complete most eradication engagements in two days. However the actual timeline may vary depending on the number of disks to be eradicated and the size in gigabytes of the disks. Sandpiper can easily scale our manpower and hardware to meet or exceed customer timing requirements.
